

Accolade Productions OB VAN

Accolade Productions is pleased to now offer an OB VAN

It is based around blackmagic's latest equipment and at the heart of the system is an Atem M2 4 K switcher. With 20 x SDI inputs. We can also ISO all cameras, audio and record the mix in various formats. It has 6 x independent aux outputs to feed projectors and monitors and has a lot of scope to be tailor made for your requirements. We can add on extra equipment such as additional cameras etc. and provide a full crew. The van is also available for dry hire only.

This is idea for small to large productions including broadcast, concerts, theatre shows, corporate events, training films, fashion shows, outside festivals, sporting events and also a variety of social media events. We can record the live mix, send to large screens or stream live over the internet - The 3 options are also available simultaneously.

All this and more at a budget that is suitable for all.

For more info contact John on **0845 29 39 348** or email John@accoladeproductions.co.uk
